Professional Summary

Full Stack Web Developer with 2 years of experience building scalable web applications using JavaScript/TypeScript, Node.js, React.js, and Next.js. Proven expertise in designing RESTful APIs, optimizing database performance, and delivering end-to-end solutions across fintech, edtech, and social networking domains. Strong collaborator with effective communication skills.

Technical Skills

Languages:	HTML, CSS, JavaScript, TypeScript
Lib/Frameworks:	Node.js, Express.js, NestJs, React.js, Redux, Next.js, Bootstrap, Tailwind CSS
Databases and Tools:	MongoDB, MySQL, Prisma, Git, Cloudinary, AWS S3
Others:	SEO and performance optimization, REST API integrations

Work Experience

Full Stack Developer

Qualhon Informatics Pvt. Ltd., Mohali, Punjab, India **Jun 2024 – Present**

- Led full-stack development of four separate real estate marketplace platforms, each featuring four dedicated panels (user and admins), built with Next.js, Node.js, and MongoDB; resolved critical bugs and delivered daily production updates under tight deadlines.
- Led the frontend development of a Next.js-based beauty and lifestyle services freelance marketplace connecting customers and service providers, along with an admin panel for managing platform operations; owned the entire frontend architecture and implementation. Optimized codebase to achieve an AI-based code review score of 8.5+/10.
- Developed admin panels for EduPortal (school management platform) using React.js (Vite) and engineered RESTful APIs with NestJS, MySQL, and Prisma ORM, serving both web and mobile applications, improving API performance by 30% through query caching.
- Developed the frontend of a thread-based social networking platform for a client using Next.js, featuring community and feed functionalities; implemented real-time notifications with Firebase and leveraged React Query for optimistic UI updates and caching to reduce API calls.

Full Stack Developer Intern

AST Consulting, Noida, UP, India **Apr 2024 – Jun 2024**

- Built scalable vendor modules for a news portal using NestJS, enhancing backend schema efficiency.
- Contributed to the development of "Edu Assist", a React.js-based academic management platform with modules for lessons, quizzes, assignments, and test papers.
- Built an image gallery application with authentication and optimized API performance using caching and rate limiting.

Self-Projects

Inseeks – Social Networking Platform | (Github Link)

MERN Stack | Socket.io | JWT | MongoDB Aggregation

- Built a full-featured social networking platform with user authentication, post creation, real-time commenting via Socket.io, and secure JWT-based authorization.

Telegram Weather Bot | (Github Link)

NestJS | TypeScript | MongoDB Atlas | React.js

- Deployed a bot delivering weather updates to subscribers at specific intervals via Telegram with MongoDB data storage.

Education

- **Chandigarh University, Mohali, Punjab, India** **Sept 2022 – July 2024**
  Master of Computer Applications, 6.90 CGPA – First Division
- **Assam Science and Technology University, Guwahati, Assam** **Aug 2018 – July 2021**
  Bachelor of Computer Applications, 8.73 CGPA – 1st class with Honours

Certifications

Hackerrank: 5-Star in Problem Solving (C++)
